

Intel Realsense D455

The image shows a robotic gripper assembly. At the top, an Intel Realsense D455 camera is mounted on a grey vertical arm. Below the camera is a grey horizontal plate. Two blue plastic gripper arms extend from the plate. Each arm has a GelSight Mini sensor at its end. A dotted line indicates a 50 mm distance between the sensors. An Aruco Tag is visible on the right gripper arm. The entire assembly is mounted on a grey base.
